

Void-Fill Protective Packaging Solutions

Innovative protective packaging that showcases your brand and demonstrates a commitment to environmentally responsible packaging can enhance your company's image, while minimising the size and weight of the overall package for lower shipping costs.

AirPouch® Void-Fill Value

- EZ-Tear™ perforations improve efficiency with pillows that are easily separated for optimum packing speed
- Durable and puncture resistant pillows inflate on demand, saving valuable warehouse space
- High-yield, boxed material reduces changeover time
- Pillows are clean, dust-free and lightweight
- Printable pillows for branding
- AirPouch® pillows are infinitely recyclable, and come in GeoTech® Oxodegradable and Reprocessed blends
- Stock products available for easy ordering

Markets Served

- Mail order fulfilment
- Pharmaceutical fulfilment
- Third party logistics
- Contract packing
- Mobile phones
- Clothes and accessories
- Shoes and boots

Exclusive EZ-Tear Perforations

AirPouch patented EZ-Tear perforations enable quick and easy separation of the pillows, allowing packers to work more efficiently with less material waste. These unique perforations also create a fuller air pillow, lowering your cost per cubic metre and creating less weight per package.

Sustainable Packaging

AirPouch inflatable void-fill uses less material than other types of protective packaging. Plus, our line of GeoTech Oxodegradable and Reprocessed products are an environmentally friendly option.

Brand Awareness

Inflatable protective packaging not only protects your product during shipping, it also gives you an opportunity for custom branding inside the box. AirPouch void-fill air pillows can be printed with your logo, design or graphics to increase brand awareness and preference.

Reduce Costs

AirPouch inflate-on-demand protective packaging yields a significant cost saving as compared to other types of void-fill, such as peanuts, foam or paper. Air pillows offer the lightest weight solution for protective packaging and are durable enough to provide excellent product protection in minimal space. AirPouch pre-formed pillows also come in a high-yield box that reduces shipping, storage and handling requirements.

- Reduce cube costs for shipping and storage
- Create the perfect fit inside the shipping package, minimising dimensional weight charges
- Prevent shipping damage, reducing product losses and returns

AirPouch pillows offer superior seals and puncture resistance for durability and reliable air retention

Products Available

Material		Pillow Width (mm)	Pillow Length (mm)					Meters/Box

Material Types

GeoTech Environmentally Friendly

- Available in Reprocessed, Oxodegradable and Oxodegradable Reprocessed options
- Stock printed with GeoTech logo for end-user awareness, custom printing available
- Available in a range of lengths and thicknesses

AirPouch High Performance

- Available in Ultra-light gauge, Light gauge and High gauge
- Custom printing available
- Available in a range of lengths and thicknesses

AirPouch Anti-Static

- Dissipates static build-up and protects sensitive components
- Pink colour for easy identification

Best Practices in Protective Packaging

With proper packing methods and materials, you can ensure your products reach their destination in perfect condition, reducing damages and returns. We manufacture a full line of AirPouch inflate-on-demand protective packaging products for a variety of uses, including:

- **Void-fill** – Limits movement that can cause damage
- **Wrapping** – Protects against vibration and shock during shipping and handling
- **Bracing** – Protect corners and edges that are the most vulnerable to damage

Use protective packaging that is specifically intended for that use

Items such as electronics and electrical components often require anti-static materials, such as our AirPouch **Anti-Static EZ-Tear Pillows**. An AirPouch specialist will help you determine the best products for your needs.

AirPouch pillows can protect your products several ways:

System Matched Materials

Service & Support

Custom Engineering & Integration

Automated Packaging Systems offers a **Total Systems Approach** to packaging by combining high-quality machines with system-matched, guaranteed-to-run packaging materials, and expert customer service and support. We help our customers streamline their packaging operations, improve productivity and lower their total cost by tailoring solutions that are perfect for their unique manufacturing needs.

All materials are categorized as a #4 plastic, which is more convenient to recycle.

The additive used in EGDC/biodegradable film has been tested by independent laboratories in accordance with standard test methods approved by ASTM, ISO, and other such standardization bodies, and has been approved for marketing as biodegradable and safe for the environment. The rate and time for biodegradation varies depending on exposure conditions. California currently prohibits labeling any plastic product as biodegradable.
